NEW YORK, Aug. 6.-A variety of depressing influences contributed toward a fairly extensive liquidation of long stocks in today's market. Substantially lower London prices for the two leading active international shares and sales of other investment stocks and bonds for foreign account paved the way for an outbreak of bear selling and throwing over of long stocks.

As an illustration, it was reported that a particular line of 10,000 shares of various securities purchased recently had been forced out today and yesterday. The markes opened feverish and fairly active at declines ranging from 1/2 to 5, per cent. Sugar was affected to the extent of nearly a point despite continued improvement in the trade outlook, evidenced by further advances in foreign and domestic re-fined grades of the product. The chief sufferers early were the graagers and internationals. During the forenoon the dealings were characterized by further liquidation and a degree of audactty on the part of the bears, two of the leaders of this contingent exerting unremitting pressure against the lit. The demonstrations were allowed to be based unon an advance in the lift. The demonstrations were allowed to be based upon an advance in call money rates to 34 per cent, which took place about midday, and reports of urrent demands for money in mercantile circles in this city. 'I have misstated. I should have said that gold was more valuable; that we had sliver alone during that period. The gold being more valuable, fled saway. Well, now, gold is disappearing; our fathers in 1831 thought they had better make a change and see if they could not keep gold and sliver together; so they changed the ratio from 15 to 1, to 15 to 1, or to be exact, to 15.98 to 1. That turned out to be

Heavy Rains Cause Rivers to Rise in Nicaragua.

NEW YORK, Aug. 6.—A dispatch from El Rama, Nicaragua, says:

Heavy rains caused the rivers Rama and Siqua in this neighborhood to rise rapidly on July 19 last. The panic stricken inhabitants took refuge on the high grounds and on board the steamers in the river Rama. Two of the steamers, the Milton and Horrock, were carried by the force of the current far down stream, their crews being poweriess to stop them. The governor of Buefields at once organized a relief corps and put provisions on board a steamer for those who had been carried down the river. The police and a committee of citizens distributed relief. Only a few buildings were left standing by the flood in El Rama. The plantations near the town was worth only two cents less than the gold dollar, can she now lift a 50 cent dollar to the height of 100 cents? (Applause.)

This, then, is the experience of the United States encountering single-handed the question of currency. We never were able when there was a difference of two or three per cent to keep the one metal alongside the other. It was always either gold or silver, never both. Now, if the United States then could not lift a silver dollar that we was worth only two cents less than the gold dollar, can she now lift a 50 cent dollar to the height of 100 cents? (Applause.)
